Such construction documents may be reviewed by other Departments of the City to verify compliance with any applicable laws under their jurisdiction. If the Building

Official finds that the work described in an application for a permit and the construction documents filed conform to the requirements of this Chapter and other pertinent laws and ordinances, and that the fees specified in the fee schedule have been paid, a permit shall be issued to the applicant.

2. *Withholding issuance of permit for payment of fees and charges.* No building permit shall be issued to a person, firm or corporation that is delinquent on payment of fees and charges due to the City for any property in the City. The holder of such permit shall proceed at his or her own risk without assurance that the permit for the entire building, structure or building service will be granted.
- B. *Validity of permit.*
1. The issuance of a permit or the stamping of construction documents with "Reviewed for Code Compliance" shall not be construed to be a permit for, or approval of, any violation of any of the provisions of this Chapter or of any other ordinance. No permit presuming to give authority to violate or

cancel the provisions of this Chapter or other ordinances shall be valid.

2. The issuance of a permit based upon reviewed construction documents shall not prevent the Building Official from requiring the correction of errors in the construction documents, or from preventing building operations from being carried on when in violation of this Chapter or of any other ordinances or laws. The Building Official is also authorized to prevent occupancy or use of a structure where in violation of this Chapter or of any other ordinance of the City.

For the purpose of this Article, the term "continuous" shall mean the normal rate of progress in keeping with good demolition practices. If the work is suspended for more than seven (7) calendar days after the work is commenced, the job shall be deemed abandoned and the permit shall expire. The Building Official may allow the work to be suspended longer than seven (7) calendar days should it be found that weather or other conditions beyond the control of the permit holder exist. The time for demolition of a one- and two-family dwelling shall not exceed forty-five (45) days from the date the demolition work commences.

D. *Suspension or revocation.*

1. *Generally.* The Building Official may, in writing, suspend or revoke a permit issued under the provisions of this Chapter whenever the permit is issued in error or on the basis of incorrect information supplied, or in violation of any provisions of this Chapter, or other pertinent laws or ordinances within the City Code. A permit shall not be valid until the fees prescribed by law have been paid, nor shall an amendment to a permit be released until the additional fees, if any, have been paid. The payment of the fee for construction, alteration, removal or demolition for work done in connection to or concurrently with the work authorized by a building permit shall not relieve the applicant or holder of the permit from the payment of other fees that are provided by law.

SECTION 500.110: - CERTIFICATE OF OCCUPANCY

- A. *Required.* No building or structure shall be used or occupied, and no change in the existing occupancy classification of a building, structure or portion shall be made, until the Building Official has issued a certificate of occupancy as provided in this Section. In addition to Chapter 700, Article II, Sections 705.180 through 705.270 of the City Code, this Article is to provide minimum requirements to safeguard the public safety, health and general welfare, insofar as they are affected by lawn sprinkler and irrigation systems.

No lawn sprinkler or irrigation system shall be installed or maintained or shall be connected to any domestic water supply when such installation or connection provides a possibility of polluting such water supply or cross-connection between a distributing system of water that becomes contaminated by such lawn sprinkler or irrigation system unless there is provided a backflow prevention device approved for the potential hazard.

SECTION 500.315: - DEFINITIONS

As used in this Article, the following terms shall have the meaning set forth next to them.

Air Gap, Irrigation System. A complete physical separation between the free flowing discharge end of a potable water supply pipe and an open or non-pressure receiving vessel.

Atmospheric Vacuum Breaker. An assembly containing an air inlet valve, a check seat, and an air inlet port. The flow of water into the body causes the air inlet valve to close the air inlet port. When the flow of water stops the air inlet valve falls and forms a check against back-siphonage. At the same time it opens the air inlet port allowing air to enter and satisfy the vacuum.

Backflow Prevention, Irrigation System. The mechanical prevention of reverse flow, or water system. The type of assembly used is based on the existing or potential degree of health hazard and backflow condition.

City right-of-way. Any land over which the City has a right to allow the public or the City's agents to pass. For purposes of this Article and the release and indemnity document specified hereunder, the definition of right-of-way set forth above shall apply whether the City's legal interest in the land is in fact a right-of-way, an easement, a license or a fee simple interest.

Cross-Connection. An actual or potential connection between a potable water source and an irrigation system that may contain contaminants or pollutants or any source of water that has been treated to a lesser degree in the treatment process.

Double Check Valve. An assembly that is composed of two independently acting approved check valves, including tightly closed resilient seated shutoff valves attached at each end of the assembly and fitted with properly located resilient seated test cocks.

Installer, Irrigation System. A person who actually connects an irrigation system to a private or public raw or potable water supply system.

Irrigation Plan. A scaled drawing of a landscape irrigation system which lists required information, the scope of the project, and represents the changes made in the installation of the irrigation system.

Irrigation System. An assembly of component parts, including the backflow device and all equipment downstream, that is permanently installed for the controlled distribution and conservation of water to irrigate any type of landscape vegetation in any location, and/or to reduce dust or control erosion. This term does not include a system that is used on or by an agriculture operation.

Irrigation Zone. A subdivision of an irrigation system with a matched precipitation rate based on plant material type (such as turf, shrubs, or trees), microclimate factors (such as sun/shade ratio), topographical features (such as slope) and soil conditions (such as sand, loam, clay, or combination) or for hydrological control.

Lawn Sprinkler system. Any system, wholly or partly affixed or buried beneath the ground surface, by which domestic water is transported through pipes or hoses to sprinkler heads (above or below ground) designed to spray water over surrounding vegetation.

Major Maintenance, Alteration, Repair, or Service (Irrigation System). Any activity that involves opening to the atmosphere the irrigation main line at any point prior to the discharge side of any irrigation zone control valve. This includes, but is not limited to, repairing or connecting into a main supply pipe, replacing a zone control valve, or repairing a zone control valve in a manner that opens the system to the atmosphere.

Pressure Vacuum Breaker. An assembly containing an independently operating internally loaded check valve and an independently operating loaded air inlet valve located on the discharge side of the check valve.

Reclaimed Water. Domestic or municipal wastewater which has been treated to a quality suitable for beneficial use, such as landscape irrigation.

Reduced Pressure Principle Backflow Prevention Assembly. An assembly containing two independently acting approved check valves together with a hydraulically operating, mechanically independent pressure differential relief valve located between the two check valves and below the first check valve.

Seed Bed Preparation. The preparation of topsoil for any seeding, sodding or

planting. A seed bed shall consist of a minimum 4 inches of topsoil.

Static Water Pressure. The pressure of water when it is not moving.

Water Conservation, Irrigation System. The design, installation, service, and operation of an irrigation system in a manner that prevents the waste of water, promotes the most efficient use of water, and applies the least amount of water that is required to maintain healthy individual plant material or turf, reduce dust, and control erosion.

SECTION 500.320: - PERMIT REQUIRED

No lawn sprinkler system shall be installed within the City until the owner of the land to be benefited by the system shall have first obtained a completed irrigation permit and submit an irrigation plan to the City.

Exceptions:

- (1) An irrigation system used on or by agriculture operation as defined by the Missouri Department of Natural Resources.
- (2) An irrigation system connected to a groundwater well used by a property owner for domestic use.

SECTION 500.325: - PERMIT APPLICATION; FEES

The process for obtaining a lawn and irrigation sprinkler permit is in Section 500.080 and 500.095 of this Chapter subject to the following restrictions:

- (1) The landowner shall complete an application for lawn sprinkler system permit generally in the forms available in the office of the Building Official.
- (2) The Building Official shall review the application to determine the following:
 - (a) That the application identifies all record owners of the property.
 - (b) That the proposed installation presents no threat to public safety.
 - (c) That the proposed installation presents no threat of damage to existing facilities of the City, the City's lessees or those to whom the City has granted easements or licenses.
 - (d) That if anyone other than the landowner proposes to install the system, then that person or firm is properly licensed under state law and local ordinances.

SECTION 500.330: - LIMITATIONS ON PERMITS

The granting of a permit pursuant to this Article shall create no easement, license or other right in the landowner, other than the limited permissive use of the City's right-of-way.

It shall be a condition of every permit that the landowner shall expressly release,

indemnify and hold harmless the City, and its employees, agents, contractors, lessees, licensees and permittees on City's right-of-way, from any and all liability, claims, suits or demands, whatsoever, which they or others may now have or which may hereafter have arising out of the placement of sprinkler heads or related components in City right-of-way.

SECTION 500.335: - CONSTRUCTION AND OPERATION OF A LAWN AND LANDSCAPE IRRIGATION SYSTEM

The location of lines and sprinkler heads for a lawn and landscape irrigation system may be located within the City right-of-way or easement subject to the following conditions and prior approval of the City:

- (1) The owner of the lawn and landscape irrigation system is responsible for any maintenance or repair of the lawn and landscape irrigation system;
- (2) The owner of the lawn and landscaping irrigation system shall operate the same in a manner that does not cause damage to adjacent property or City infrastructure.

Prior to any seed, sod or landscaping being placed within the lawn and landscape irrigation system, there shall be proper seedbed preparation by the owner.

In accordance with Municipal Code Section 705.010, the Mayor may place an irrigation ban or other restrictions on the use of any lawn and irrigation system connected to the City water supply system.

3. Inspect any building or structure of the City at any time whenever there is reason to believe that the building or structure has a condition described in Section 510.020 of the City Code.
4. Post any building, structure or property, when it reasonably appears that there is an immediate danger to the health, safety or welfare of any persons because of any condition described in Section 510.020, of the City Code, with a written notice reading substantially as follows:

"This building has been found to be a dangerous building by the Building Official. This written notice is to remain on this property, this building or structure until it is repaired, vacated or demolished and the property is cleaned up in accordance with the written notice that has been given the owner, occupant, lessee, mortgagee or agent of the property and all other persons having an interest in this building or structure as shown by the land records of the Cass County Recorder of Deeds. It is unlawful to remove this written notice until such notice is complied with."

 - a. Written notice of said hearing shall be given either by personal service or by certified mail, return receipt requested, or if service cannot be had

by either of those modes of service, then by publication in a newspaper qualified to publish legal notices, at least ten (10) days in advance of the hearing date, to the owner, occupant, mortgagee, lessee, agent and all other persons having an interest in said building as shown by the land records of the Cass County Recorder of Deeds to appear before the Board of Appeals on the date specified in the written notice to show cause why the building or structure reported to be a dangerous building should not be repaired, vacated or demolished in accordance with the statement of particulars set forth in the Building Official's written notice as provided herein.

- b. Any party may be represented by counsel and all parties shall have an opportunity to be heard.
- c. Make written findings of fact from the evidence offered at said hearing as to whether or not the building in question is a dangerous building within the terms of Section 510.020 of this Chapter.

- e. If the owner, occupant, mortgagee or lessee fails to comply with the order within thirty (30) days, the City's Board of Appeals shall cause such building or structure to be repaired, vacated or demolished and the property cleaned up as the facts may warrant. SECTION 510.090: - USE OF INSURANCE PROCEEDS; REIMBURSEMENT OF CITY'S COST

- A. If there are proceeds of any insurance policy based on a covered claim payment for damage or loss to a building or structure arising out of or caused by fire, explosion or other casualty loss, and the covered claim payment exceeds fifty percent (50%) of the face value of the policy covering such building or structure, then the insurer shall pay to the City Finance Department a sum equal to twenty-five percent (25%) of the insurance proceeds of the covered claim, within thirty (30) days of the determination of coverage, to be held by the City in an interest-bearing account. Nothing in this Section shall be construed to affect the priority of a named mortgagee on the insurance policy to the proceeds of the policy. The proceeds shall be used to reimburse the City for its costs in the removal of such building or structure, if necessary.
- B. The City shall release the proceeds and any interest that has accrued on such proceeds received to the insured or as the terms of the policy and endorsements within thirty (30) days after receipt of such insurance proceeds, unless the City has instituted legal proceedings under the provisions of Section 510.070 A (1) (e) of this Chapter. - D. Subsection (A) of this Section shall apply to fire, explosion or other casualty loss claims arising on all buildings and structures.
- E. It shall be unlawful for an insurance carrier to fail to pay insurance proceeds to the City after being notified pursuant to this Chapter.
- F. Subsection (A) of this Section does not make the City a party to any insurance contract and the insurer is not liable to any party for any amount in excess of the proceeds otherwise payable under its insurance policy.
- G. The Board of Appeals may certify in lieu of payment of all or part of the covered claim under Subsection (A) that it has obtained satisfactory proof that the insured has removed or will remove the debris and repair, rebuild or otherwise make the premises safe and secure. In this event, the Board of Appeals shall issue a certificate within thirty (30) days after receipt of proof to permit covered claim payment to the insured without the deduction pursuant to Subsection (A) of this Section. Except as otherwise expressly permitted by State or Federal law, no other person may use the ROW-user's right unless authorized by the City.

- D. All ROW-users shall be subject to all rules, regulations, policies, resolutions and ordinances now or hereafter adopted or promulgated by the City in the reasonable exercise of its Police power and are subject to all applicable laws, orders, rules and regulations adopted by governmental entities now or having jurisdiction. In addition, the ROW-users shall be subject to all technical specifications, design criteria, policies, resolutions and ordinances now or adopted or promulgated by the City in the reasonable exercise of its Police power relating to permits and fees, sidewalk and pavement cuts, utility location, construction coordination, surface restoration and other requirements on the use of the right-of-way.

In the event a service provider shall sell, transfer, lease, assign, sublet or dispose of its facilities that are located in City right-of-way, or any right, title or interest in the same, or transfer any rights granted by the City to any person either by forced or involuntary sale, or by ordinary sale, consolidation or otherwise, it shall notify the City of same. In such case, the buyer, transferee, lessee or assignee shall be subject to the terms and conditions of this Article, including the requirement to register as provided in the preceding Section. This provision shall not apply to the sale of property or equipment in the normal course of business. providing service within the City, including the service provider's subsidiary or affiliate. Unless otherwise prohibited by law or regulatory authority, the service provider shall use all reasonable efforts to provide the City on an annual basis the identity of entities with which the service provider has entered into an interconnection and/or resale agreement within the City. This notice will not relieve the reseller service provider from its own obligation to register and obtain any necessary franchise with the City. Nothing in this Article shall prevent a facility-based service provider from providing to any reseller service provider the use of the facility-based service provider's facilities in the right-of-way as authorized by Federal or State law.

SECTION 515.090: - USE OF THE RIGHT-OF-WAY

- A. The ROW user's use of the right-of-way shall in all matters be subordinate to the City's use or occupation of the right-of-way. Without limitations of its rights, the City expressly reserves the right to exercise its governmental powers now and hereafter vested in or granted to the City.
- B. The ROW user shall coordinate the placement of facilities in a manner that minimizes adverse impact on any public improvement as reasonably determined by the City. Where placement is not regulated, the facilities shall be placed with adequate clearance from such public improvements so as not to impact or be impacted by such public improvement as defined in the City's Manual of Infrastructure Standards available in the office of the City Engineer.
- C. The ROW user shall consider any request made by the City concerning placement facilities in private easements in order to limit or eliminate future street improvement relocation expenses.
- D. All facilities shall be located and laid so as not to disrupt or interfere with any pipes, drains, sewers, irrigation systems or other structures or public improvements already installed. In addition, the ROW user shall, in doing work in connection with its facilities, avoid, so far as may be practicable, disrupting or interfering with the lawful use of the streets, alleys, sidewalks or other public lands of the City.
- E. All facilities of the ROW user shall be placed so that they do not interfere with the use of right-of-way and public lands. The City, through its City Engineer, shall have the right to consult and review the location, design and nature of the facility prior to installation.
- F. The ROW user shall not interfere with the facilities of the other ROW users without their permission. If and when the City requires or negotiates to have a service provider cease using its existing poles and to relocate its facilities underground, all other service providers using the same poles shall also

relocate their facilities underground at the same time. The cost of such relocation shall be in accordance with this Article and the applicable tariff governing that service provider.

- G. The City Engineer may assign specific corridors within the right-of-way, or any particular segment as may be necessary, for each type of facility that is currently or, pursuant to current technology, the City Engineer expects will someday be located within the right-of-way. All right-of-way permits issued by the City Engineer shall indicate the proper corridor for the ROW user's facilities. Any ROW user whose facilities are currently in the right-of-way in a position at a variance with the designated corridors shall, no later than at the time of next reconstruction or excavation of the area where its facilities are located, move the facilities to its assigned position within the right-of-way, unless this agreement is waived by the City Engineer for good cause shown, upon consideration of such factors as the remaining economic life of the facilities, public safety, user service needs and hardship to the ROW user.
- H. If, in the preparation and planning of a right-of-way project, the City Engineer deems it appropriate for a conduit to be constructed along, across or under the right-of-way, the City Engineer shall contact all appropriate ROW users for their input on the planning and design of such conduit. If a ROW user desires to construct, maintain or operate facilities along such right-of-way, the City Engineer may require the ROW user to use such conduit and to contribute to the expense of such conduit; provided however, the ROW user's use of the conduit is reasonable and appropriate under the circumstances.
- I. All earth, materials, sidewalks, paving, crossings, utilities, other public improvements or improvements of any kind damaged or removed by the ROW user shall be fully repaired or replaced within five (5) working days by the ROW user at its sole expense and to the reasonable satisfaction of the City. Upon determination by the City Engineer that such repair or replacement is a public safety matter, all such repair or replacement shall be corrected within twenty-four (24) hours of notice from the City, or the City Engineer may direct the City to make such repair or replacement and bill the ROW user for the City cost. The City Engineer has the authority to inspect the repair or replacement of the damage and, if necessary, to require the ROW user to do any necessary additional work.
- J. All technical standards governing construction, reconstruction, installation, operation, testing, use, maintenance and dismantling of a ROW user's facilities in the right-of-way shall be in accordance with applicable Federal, State and local laws and regulations, including those promulgated by national trade associations commonly associated with the service provided by the ROW user. A ROW user shall not construct or reconstruct any of its facilities located upon, over, under or within the City right-of-way without first having submitted in writing a description of its planned improvements to the City Engineer and having received a permit for such improvement. The City Engineer may require

that any drawings, plans and/or specifications submitted be certified by a qualified professional stating that such drawings, plans and/or specifications comply with all applicable technical codes, rules and regulations, unless such plans are based directly on nationally recognized codes.

- K. The ROW user shall cooperate promptly and fully with the City and take all reasonable measures necessary to provide accurate and complete on-site information regarding the nature and location of its facilities within the right-of-way, both underground and overhead, when requested by the City or its authorized agent for a public improvement. Such location and identification shall be at the sole expense of the ROW user without any expense to the City, its employees, agents or authorized contractors.
- L. Unless otherwise permitted by law, it shall be unlawful for any person to place or maintain any object, platform, structure or obstruction, such as, but not limited to, a basketball goal, skateboard ramp, trampoline, fence, flagpole, dumpster, yard ornament, sump pump discharge pipe, or similar item, either temporarily or permanently, over any street or sidewalk or in any part of the City's right-of-way except by written approval of the City Engineer.
- M. No unauthorized person shall, in a commercial or industrial zoned district, deposit or cause to be deposited any snow or ice on any public roadway or right-of-way.

SECTION 515.100: - FACILITY RELOCATION

- A. The ROW-user shall promptly remove, relocate or adjust any facilities located in the right-of-way as directed by the City for a public improvement or when reasonably required by the City by reason of public safety. Such removal, relocation or adjustment shall be performed by the ROW-user at the ROW-user's sole expense without expense to the City, its employees, agents or authorized contractors, and shall be specifically subject to rules, regulations and schedules of the City pertaining to such. The ROW-user shall proceed with relocations at due diligence upon notice by the City to begin relocation.
- B. The ROW-user shall promptly remove, relocate or adjust any facilities located in private easement, at the City's cost and as directed by the City, for a public improvement, by moving such facilities to areas within the expanded right-of-way or within remaining private easements or remaining portions of such easements not condemned by nor disclaimed to the City to avoid conflict with City construction and improvements. The ROW-user shall disclaim those parts of its easements which lie within the expanded right-of-way. Should the City, in the future, elect to require the ROW-user to again relocate its facilities to other areas within the expanded right-of-way, the cost of any such future relocation shall be borne by the City.
- C. As soon as working drawings are available for public improvements that will require the ROW-user to relocate its facilities, the City shall provide the

ROW-user with written notice of relocations and the anticipated bid-letting date of said improvement. The ROW-user shall respond with any conflicts and a proposed construction schedule within thirty (30) days.

- D. Following notice by the City in the form of the delivery of final design plans for such public improvements, the ROW-user shall remove and relocate its facilities in accordance with the mutually agreed upon schedule, provided the project is not delayed by adverse weather conditions and other factors beyond the control of the ROW-user. The ROW-user shall certify to the City, in writing, that its facilities have been relocated or adjusted to clear construction in accordance with project plans provided by the City.
- E. Any damages suffered by the City, its agents or its contractors to the extent caused by ROW-user's failure to timely relocate or adjust its facilities, or failure to properly relocate or adjust such facilities, shall be borne by the ROW-user.
- F. In the event the ROW-user is required to move its facilities in accordance with this Section, any ordinary right-of-way permit fee shall be waived.
- G. It is the intent of this Section for both the City and the ROW-user to cooperate with one another so that the need for facility relocation is minimized and, when required and feasible, relocations may be completed prior to receipt of bids by the City for a public improvement.

SECTION 515.110: - PROTECTION OF THE PUBLIC

- A. It shall be the responsibility of the ROW-user to take adequate measures to protect and defend its facilities in the right-of-way from harm and damage.

- C. After any excavation, the permittee shall, at its expense, restore all portions of the right-of-way to the same condition, or better than, that it was prior to the excavation.
- D. If the permittee fails to restore the right-of-way in the manner and to the conditions required by the City Engineer, or fails to satisfactorily and timely complete all restoration, the City may, at its option, serve written notice upon the permittee and its surety that, unless within five (5) days after serving of such notice, a satisfactory arrangement can be made for the proper restoration of the right-of-way, the City shall immediately serve notice of failure to comply upon the surety and the permittee, and the surety shall have the right to take over and complete the work; provided however, that if the surety does not commence performance within ten (10) days from the date of notice, the City may take over the work and prosecute the same to completion, by contract or otherwise, at the expense of the permittee, and the permittee and its surety shall be liable to the City for any and all excess cost assumed by the City by reason of such prosecution and completion.
- E. The permittee responsible for the excavation who leaves any debris in the right-of-way shall be responsible for providing safety protection in accordance with the latest edition of the Manual of Uniform Traffic Control Devices and any applicable Federal or State requirement.
- F. If an excavation cannot be back-filled immediately and is left unattended, the permittee shall securely and adequately cover the unfilled excavation. The permittee has sole responsibility for maintaining proper barricades, safety fencing and/or lights as required, from the time of the opening of the

excavation until the excavation is surfaced and opened for travel.

This supplementary application must be submitted to the City prior to the permit end date.

SECTION 515.230: - OTHER OBLIGATIONS

- B. Except in cases of an emergency or with approval of the City Engineer, no right-of-way work may be done when conditions are unreasonable for such work.
- C. A permittee shall not disrupt a right-of-way such that the natural free and clear passage of water through the gutters or other waterways is interfered with. Private vehicles may not be parked within or next to the permit area.

SECTION 515.240: - DENIAL OF PERMIT

- A. The City Engineer may deny a permit to protect the public health, safety and welfare to prevent interference with the safety and convenience of ordinary travel over the right-of-way or when necessary to protect the right-of-way and its users. The City Engineer, at their discretion, may consider one (1) or more of the following factors in denial of the permit:
 - 1. The extent to which the right-of way space where the permit is sought is available;
 - 2. The competing demands for the particular space in the right-of-way;
 - 3. The availability of other locations in the right-of-way or in other right-of-way for the facilities of the applicant;
 - 4. The applicability of any ordinance or other regulations that affect location

of facilities in the right-of-way;

5. The degree of compliance of the applicant with the terms and conditions of its franchise, this Article and other applicable ordinances and regulations;
 6. The degree of disruption to surrounding communities and businesses that will result from the use of that part of the right-of-way;
 7. The condition and age of the right-of-way which was constructed or reconstructed within the preceding five (5) years;
 8. The balancing of costs of disruption to the public and damage to the right-of-way against the benefits to that part of the public served by the construction in the right-of-way;
 9. Whether the applicant maintains a current occupational license with the City;
 10. Whether the applicant has failed within the last three (3) years to comply, or is presently not in full compliance with, the requirements of this Article;
 11. Whether the applicant has delinquent debt owed to the City;
 12. Whether the issuance of a right-of-way permit for the particular dates and/or time requested would cause a conflict or interferes with an exhibition, celebration, festival or any other event. In exercising this discretion, the City Engineer shall be guided by the safety and convenience of anticipated travel of the public over the right-of way.
- B. Notwithstanding the above provisions, the City Engineer may in their discretion issue a right-of-way permit in any case where the permit is necessary to:
1. Prevent substantial economic hardship to a user of the applicant's service;
 2. Allow such user to materially improve the service provided by the applicant.

SECTION 515.250: - REVOCATION OF PERMIT

 7. Repeated traffic control violations; or
 8. Failure to repair facilities damaged in the right-of-way.
- B. If the City Engineer determines that the permittee has committed a substantial breach of any law or condition placed on the right-of-way permit, the City Engineer shall make a written demand upon the permittee to remedy such violation. The demand shall state that the continued violation may be cause for revocation of the permit or legal action if applicable. Further, a substantial breach, as stated above, will allow the City Engineer, at his discretion, to place additional or revised conditions on the right-of-way permit, specifically related to the manner in which the breach is cured by the permittee. Within five (5) calendar days of receiving notification of the breach, permittee shall contact the City Engineer with a plan, acceptable to the City Engineer, for correction of the breach. Permittee's failure to contact the City Engineer, permittee's failure to submit an acceptable plan or permittee's failure to reasonably implement the approved plan shall be cause for immediate revocation of the right-of-way permit.
- C. If a right-of-way permit is revoked, the permittee shall also reimburse the City for the City's reasonable costs, including administrative costs, restoration costs and the costs of collection and reasonable attorneys' fees incurred in connection with such revocation.

SECTION 515.260: - WORK REQUIREMENTS AND INSPECTIONS

- A. Any excavation, backfilling, repair and restoration, and all other work performed in the right-of-way shall be done in conformance with the City's standards as promulgated by the City Engineer.
- B. The permittee will notify the City Engineer to schedule an inspection at the start of backfilling. Upon completion of all right-of-way restoration activities, the permittee will schedule a closeout inspection. In the event a permittee fails to obtain any interim inspections, the City Engineer may require re-opening of the excavation to allow such inspections.
- C. The permittee shall notify the office of the City Engineer upon completion of the authorized work permit.
- D. When any corrective actions required have been completed and inspected to the City Engineer's satisfaction, the two (2) year maintenance period will begin.
- E. In addition to the required scheduled inspections, the City Engineer may choose to inspect the ongoing permitted work in the right-of-way at any time to ensure that all requirements of the approved permit are being met by the permittee.

- F. At the time of any inspection the City Engineer may order the immediate cessation of any work which poses a serious threat to the life, health, safety or well-being of the public. The City Engineer may issue a citation to the permittee for any work which does not conform to the applicable standards, conditions, code or terms of the permit. The citation shall state that failure to correct the violation will be cause for revocation of the permit.

SECTION 515.270: - APPEALS PROCESS

- A. Whenever a permittee shall deem themselves aggrieved by any decision or action taken by the City Engineer, the person may file an appeal to the City Manager within ten (10) calendar days of the date of notice of such decision or action.
- B. The permittee shall be afforded a hearing on the matter before the City Manager within thirty (30) days of filing the appeal.
- C. In cases of applicability or interpretation of the rules, the City Manager may revoke such decision or action taken by the City Engineer.
- D. Unless the aggrieved order is revoked, such order, decision or action shall remain in force and be complied with by the permittee forthwith.
- E. In cases where compliance with such decision or action taken by the City Engineer would cause undue hardship, the City Manager may extend the time limit of such decision or action, or may grant exceptions to, or waive requirements of, or grant a variance from the specific provisions of rules. The City Manager shall give due consideration to the purposes of the rules in preserving public safety and convenience, integrity of public infrastructure and the operational safety and function of the public right-of-way.
- F. If a permittee still deems themselves aggrieved after the appeal to the City Manager, such permittee shall have thirty (30) days after the effective date of the City Manager's final decision to appeal the decision to the City Council in writing.
- G. If a permittee still deems themselves aggrieved after the appeal to the City Council, such permittee shall have thirty (30) days after the effective date of the City Council's final decision to institute an action in the Circuit Court of Cass County, Missouri.

A permittee operating under the provisions of this Article shall fully indemnify, release, defend and hold harmless the City and agents of the City when acting in their capacity as municipal officials, employees and agents, from and against any and all claims, demands, suits, proceedings and actions, liability and judgment by other persons for damages, losses, costs and expenses, including attorney fees, to the extent caused by negligent acts or omissions of the permittee in the performance of the permitted work. The City agrees to timely notify permittee of

such claim, demand, suit, proceeding and/or action by providing written notice to permittee. Nothing herein shall be deemed to prevent the City, or any agent, from participating in the defense of any litigation by their own counsel at their own expense. Such participation shall not under any circumstances relieve the person from the duty to defend against liability or its duty to pay any judgment entered against the City, or its agents.

The customer's premises shall be open at all reasonable times to the City, or their authorized representative, for the conduction of surveys and investigations of water use practices within the customer's premises to determine whether there are actual or potential cross-connections to the customer water system through which contaminants or pollutants could backflow into the public potable water system.

- B. Upon request by the City or their authorized representative, the customer shall furnish information on water user practices within their premises.
- C. It shall be the responsibility of the water customer to conduct periodic survey of water use practices on their premises to determine whether there are actual or potential cross-connections to their water system through which contaminants or pollutants could backflow into their or the public potable water system.

SECTION 705.180: - TYPE OF PROTECTION REQUIRED

The type of protection required shall depend on the degree of hazard which exists as follows:

- A. An approved backflow prevention device shall be installed on each service line to a customer's water system serving premises where, in the judgment of the water supplier or the Missouri Department of Natural Resources, actual or potential hazards to the public potable water system exist. The type and degree of protection required shall be commensurate with the degree of hazard.
- B. An approved air-gap separation or reduced pressure principle backflow prevention device shall be installed after the metered flow of any service connection or within any premises where, in the judgement of the City or the Missouri Department of Natural Resources, the nature and extent of activities on the premises, or the materials used in connection with the activities, or materials stored on the premises, would present an immediate and dangerous hazard to health should a cross-connection occur, even though such cross-connection may not exist at the time the backflow prevention device is required to be installed. This includes but is not limited to the following situations:

1. Premises having an auxiliary water supply, unless the quality of the auxiliary supply is acceptable to the City and the Missouri Department of Natural Resources.
 2. Premises having internal cross-connections that are not correctable or intricate plumbing arrangements which make it impractical to ascertain whether or not cross-connections exist.
 3. Premises where entry is restricted so that inspections for cross-connections cannot be made with sufficient frequency or at sufficiently short notice to assure the cross-connections do not exist.
 4. Premises having a repeated history of cross-connections being established or re-established.
 5. Premises, which due to the nature of the enterprise, are subject to recurring modification or expansion.
 6. Premises on which any substance is handled under pressure so as to permit entry into the public water supply or where a cross-connection could reasonably be expected to occur. This shall include the handling of process waters and cooling waters.
 7. Premises where materials of a toxic or hazardous nature are handled such that if backsiphonage or backpressure should occur, a serious health hazard may result.
- C. The following types of facilities fall into one (1) or more of the categories of premises where an approved air-gap separation or reduced pressure principle backflow prevention device is required by the water supplier and the Missouri Department of Natural Resources to protect the public water supply and must be installed at these facilities unless all hazardous or potentially hazardous conditions have been eliminated or corrected by other methods to the satisfaction of the water supplier and the Missouri Department of Natural Resources.

SECTION 705.200: - BACKFLOW PREVENTION DEVICES

- A. Any backflow prevention device required by this Chapter shall be of a type, model and construction approved by the water supplier and the Missouri Department of Natural Resources as follows:
 1. Air-gap separation to be approved shall be at least twice the diameter of the supply pipe, measured vertically above the top rim of the vessel, but in no case less than three (3) inches.

2. Double-check valve assemblies or reduced pressure principle backflow prevention devices shall be of Watts manufacture series No. 709 or 909 or an approved equivalent.
- B. Existing backflow prevention devices approved by the water supplier at the time of installation and properly maintained shall, except for inspection and maintenance requirements, be excluded from the requirements of this Chapter so long as the water supplier is assured that they will satisfactorily protect the water system. Whenever the existing device is moved from its current location, or requires more than minimum maintenance, or when the water supplier finds that the maintenance or lack of maintenance constitutes a hazard to health, the unit shall be replaced by a backflow prevention device meeting the requirements of this Chapter.

All inspections, testing, cleaning, repairs and overhauls of backflow prevention devices shall be performed by a State of Missouri Certified Backflow Prevention Service Tester who holds a current, valid occupational license in accordance with Chapter 605 of the Raymore City Code. It shall be the responsibility of the customer to provide the City with written inspection documentation upon receipt.

- B. Water service to such premises shall not be restored until the customer has corrected or eliminated such conditions or defects in conformance with this Chapter to the satisfaction of the water supplier.

ARTICLE III. - LEAD BAN POLICY

SECTION 705.240: - LEAD BAN—GENERAL POLICY

- A. *Purpose.* The purpose of this Article is:
 - 1. To ban the use of lead materials in the public drinking water system and private plumbing connected to the public drinking water system; and
 - 2. To protect City residents from lead contamination in the City's public drinking water system and their own private plumbing system.
- B. *Application.* This Article shall apply to all premises served by the public drinking water system of the City.
- C. *Policy.* This Article will be reasonably interpreted by the water purveyor. It is the purveyors intent to ban the use of lead based material in the construction or modification of the City's drinking water system or private plumbing connected

to the City system. The cooperation of all consumers is required to implement the lead ban.

If, in the judgment of the water purveyor or their authorized representative, lead base materials have been used in new construction or modifications after January 1, 1989, due notice shall be given to the consumer. The consumer shall immediately comply by having the lead base materials removed from the plumbing system and replaced with lead-free materials. If the lead base materials are not removed from the plumbing system, the water purveyor shall have the right to discontinue water service to the premises.

SECTION 705.250: - LEAD BANNED FROM DRINKING WATER PLUMBING

- A. No water service connection shall be installed or maintained to any premises where lead base materials were used in new construction or modifications of the drinking water plumbing after January 1, 1989.
- B. If a premises is found to be in violation of Subsection (A) of this Section, water service shall be discontinued until such time that the drinking water plumbing is lead-free.

CHAPTER 710: - SANITARY SEWERS

ARTICLE I. - IN GENERAL

SECTION 710.005: - GENERAL STANDARDS

All private sewage disposal systems within the City, regardless of location, shall meet all applicable City codes, and where cases of conflict arise, the most stringent shall apply.

SECTION 710.010: - CLEAN WATER COMMISSION PERMIT REQUIRED

- A. All private sanitary sewer disposal systems except those serving single family residences of all kinds, now existing or constructed, shall be operated and maintained by the duly designated operator only after a proper operating permit is secured from the Missouri Clean Water Commission and the City.
- B. Each private sanitary sewer disposal system shall be maintained and operated pursuant to the rules, standards and regulations promulgated by the Missouri Clean Water Commission and such other governmental agencies which have jurisdiction and control over the same; including the City.

SECTION 710.020: - NON-COMPLIANCE WITH OPERATING REQUIREMENTS

Each private sanitary sewage disposal system shall be operated only so long as full compliance is made under the necessary standards, regulations, and rules, and upon the City determining non-compliance or being duly notified by the Missouri

Clean Water Commission or such other governmental agency, State or Federal, which has jurisdiction and control over the same, that there is a failure to comply, then the City may request the operator to comply within ten (10) days. In the event of default and failure to comply, the City may take such action as may be necessary to repair, maintain, or upgrade the sanitary sewer system so that the same will comply and all expenses shall be chargeable to the operator or the City may revoke the operating permit and such systems shall not be operated until it is determined that there is satisfactory compliance. Within the time granted by the City to comply, the operator may apply for a hearing before the City Council to request a stay for good cause.

SECTION 710.030: - DEDICATION TO PUBLIC USE

No private sanitary sewage systems shall be dedicated to or accepted by the City as a public sanitary sewer disposal system until such time as the City, by ordinance, approves and accepts the same.

SECTION 710.040: - CONSTRUCTION

All private sanitary sewage disposal systems must fully comply and conform to the standards and regulations of the Missouri Clean Water Commission and such other governmental agencies as may have jurisdiction and control over the same including the City and if the same is a private sanitary sewer company under the jurisdiction of the Missouri Public Service Commission, the same shall not be operated as such until a franchise is secured from the City.

SECTION 710.050: - PUBLIC OPERATION OF SANITARY SEWER

The City may, upon proper application, agree to accept a sanitary sewer system as constructed or to be constructed in the future provided the same is constructed in conformity with the provisions of this Chapter and to operate the same as a public sanitary sewer disposal system only as planned and designed within its capability and no connection shall be made to any point within said sanitary sewer system without a permit being first duly secured from the City. The City shall receive all revenues generated from the operation of said sewage disposal system and shall prescribe such rates to be paid by the user as the City deems reasonable for the operation of such sanitary sewer system.

SECTION 710.060: - NOT CREATE HEALTH HAZARD

All sanitary sewer disposal systems, laterals, septic tanks, or other means of waste disposal of all kinds now existing or constructed shall be operated, maintained and used only in a manner so as not to create a health hazard, be injurious to the public welfare, cause the emission of odoriferous fumes, or create or contribute to create standing, stagnant or polluted streams or pools of water.

ARTICLE II. - PUBLIC SANITARY SEWERS

SECTION 710.070: - ESTABLISHMENT OF RULES AND REGULATIONS

The following rules and regulations are adopted to govern the sanitary sewer services furnished by the City in a uniform manner for the benefit of the City and its sanitary sewer users. They are subject to change from time to time. All such changes must be approved by the State Director of the Farmers Home Administration, United States Department of Agriculture, or their successor, so long as the municipality City has unpaid obligations which are held by or insured by the United States of America. If any portion of these rules shall be declared invalid by competent authority, such voidance shall not affect the validity of the remaining portions.

SECTION 710.080: - UNLAWFUL TO PLACE GARBAGE ON PUBLIC OR PRIVATE PROPERTY

It shall be unlawful for any person to place, deposit, or permit to be deposited in any unsanitary manner on public or private property within the City or in any area under the jurisdiction of said City, any human or animal excrement, garbage, or other objectionable waste.

SECTION 710.090: - UNLAWFUL TO DISCHARGE SEWAGE TO ANY NATURAL OUTLET

It shall be unlawful to discharge to any natural outlet within the City or in any area under the jurisdiction of the City, any sewage or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this Article.

SECTION 710.100: - PRIVY, SEPTIC TANK, ETC., PROHIBITED

Except as provided, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of sewage.

SECTION 710.110: - APPLICABILITY

- A. No private sewage disposal system shall be constructed or operated in the City where public sanitary sewer is available. Every effort shall be made to secure a sanitary sewer connection to public sanitary sewers as defined in Section 710.120. Where a connection to a public sanitary sewer is not feasible and when a considerable number of residences are to be served, consideration may be given to the construction of a private or community sanitary sewer system and collection and treatment facility. However, since an improperly operated or inadequately staffed private or community sewage treatment plant cannot effectively treat wastes, consideration should be given to the size of the

proposed system to insure that economically feasible sanitary sewer rates are sufficient to ensure proper treatment plant operation.

- B. When the installation of a private residential sewage disposal system cannot be avoided, all requirements of the Missouri laws and rules governing on-site sewage systems shall be applicable.

SECTION 710.120: - CONNECTIONS TO PUBLIC SANITARY SEWER REQUIRED

- A. The owner of all houses, buildings or properties used for human occupancy, employment, recreation or other purposes, situated within the City and abutting on any street, alley or right-of-way in which there is now located or may in the future be located, a public sanitary sewer of the City, is required at their expense to install suitable toilet facilities and to connect to such facilities within ninety (90) days after the date of official notice to do so, provided that public sanitary sewer is within three hundred (300) feet of the primary structure upon any lot with an existing individual sewage disposal system. An extension of ninety (90) days may be granted by the office of the Director of Public Works when requested in writing. An extension may be granted up to a maximum of one hundred eighty (180) days after the date of official notice
- B. Existing residences with an individual sewage disposal system that is properly functioning are not required to connect to a public sanitary sewer system. Should the individual sewage disposal system fail, connection shall be made to a public sanitary sewer system. If no public sanitary sewer system is available within three hundred (300) feet of the primary structure, then the individual sewage disposal system may be repaired or replaced.

SECTION 710.130: - ON-SITE SANITARY SEWAGE DISPOSAL SYSTEMS

- A. *Applicability.* Where a public sanitary sewer is not available under the provisions of Section 710.120, the building sanitary sewer shall be connected to a private on-site sewage disposal system complying with the provisions of this Section. Repairs, as defined by this Section, to existing systems and replacement of existing systems shall comply with the provisions of this Section.
- B. Before commencement of construction of a private sewage disposal system, the owner shall first obtain a written permit signed by the Building Official. The application for such permit shall be made on a form furnished by the City which the applicant shall supplement by any plans, specifications, and other information as are deemed necessary by the Building Official. A permit and inspection fee, approved by the Governing Body and listed in the Schedule of Fees and Charges maintained in the Finance Department, shall be paid to the City of Raymore prior to the issuance of the permit.
- C. *Permit.* Any person, firm or corporation wishing to repair an existing system, replace an existing system, or construct an on-site sewage disposal system must first obtain a permit from the Building Official. Repairs to an existing

system that would require a permit include, but are not limited to, pipe repair ten feet or more in length, septic tank repair or replacement, alteration or reconstruction of any wastewater pond, relocation or replacement of the absorption field, or similar repair actions.

- D. *Penalties.* Upon conviction or a plea of guilty, any person, firm or corporation violating or failing to comply with any of the provisions of this Chapter shall be subject to the penalty provisions provided for in Section 100.220 of the City Code.

SECTION 710.140: - PUBLIC SANITARY SEWERS

- A. No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sanitary sewer or appurtenance thereof without first obtaining a written permit from the Building Official.
- B. There shall be two (2) classes of building sanitary sewer permits:
 - 1. For residential and commercial service, and
 - 2. For service to establishments producing industrial wastes.

In either case, the owner or their agent shall make application on a special form furnished by the City. The permit application shall be supplemented by any plans, specifications, or other information considered pertinent in the judgment of the Inspector. A permit and inspection fee, approved by the Governing Body by resolution and listed in the Schedule of Fees and Charges maintained in the Finance Department, shall be paid to the City prior to the issuance of the permit.

- C. All costs and expenses incidental to the installation and connection of the building sanitary sewer, shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sanitary sewer.
- D. Except for an approved accessory dwelling unit, a separate and independent building sanitary sewer shall be provided for every building ;or tenant space.
- E. Existing building sanitary sewers may be used in connection with new buildings only when they are found, on examination and test by the City's Building Official, to meet all requirements of this Article.
- F. The size, slope, alignment, materials of construction of a building sanitary sewer, and the methods to be used in excavating, placing of the pipe, jointing, testing, and backfilling the trench, shall all conform to the requirements of the building and plumbing code or other applicable rules and regulations of the City. In the absence of code provisions or implications, the materials and procedures set forth in appropriate specifications of the Missouri Department of Natural Resources and the Kansas City Metropolitan APWA standards.

- G. No person shall make connection of roof downspouts, exterior foundation drains, areaway drains, or other sources of surface runoff or groundwater to a building sanitary sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.
- H. *Connections—Conformance With Codes, Regulations, Etc.*
1. The connection of the building sanitary sewer into the public sanitary sewer shall conform to the requirements of the building and plumbing code or other applicable rules and regulations of the City. Any deviation from the prescribed procedures and materials must be approved by the Building Official before installation.
 2. The service line including the connection to the public sanitary sewer shall remain the property of the customer and be subject to the jurisdiction of the City. Maintenance and/or repair of the building sanitary sewer or connection shall be the responsibility of the customer. The City will not assume responsibility for uncovering the building sanitary sewer or connection.
- I. The applicant for the service line permit shall notify the Building Official when the service line is ready for inspection and connection to the public sanitary sewer. The connection shall be made under the supervision of the Building Official or their representative.
- J. All excavations for service line installations shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the City.

SECTION 710.150: - DISCHARGE OF STORMWATER, DRAIN WATER, ETC., TO ANY SANITARY SEWER

No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, including interior and exterior foundation drains, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer.

SECTION 710.160: - UNPOLLUTED DRAINAGE DISCHARGE TO STORM SEWER

Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Public Works Director. Industrial cooling water or unpolluted process waters may be discharged on approval of the Public Works Director, to a storm sewer, combined sewer, or natural outlet.

SECTION 710.170: - TOXIC WASTES SHALL NOT BE DISCHARGED

No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

1. Any flammable or explosive liquid, solid, or gas.
2. Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two (2) mg/l as CN in wastes as discharged to the public sewer.
3. Any waters or wastes having a five (5) day biochemical oxygen demand greater than three hundred (300) parts per million by weight, or containing more than three hundred fifty (350) parts per million by weight of suspended solids, or having an average daily flow greater than two percent (2%) of the average sewage flow of the City, shall be subject to the review of the Public Works Director. Where necessary in the opinion of the Public Works Director, the owner shall provide, at their expense, such preliminary treatment as may be necessary to (1) reduce the biochemical oxygen demand to three hundred (300) parts per million by weight, or (2) reduce the suspended solids to three hundred fifty (350) parts per million by weight, or (3) control the quantities and rates of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Public Works Director and no construction of such facilities shall be commenced until said approvals are obtained in writing.
4. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works.
5. Any water or wastes having a pH lower than five and five-tenths (5.5) or having any other corrosive properties capable of causing damage or hazards to structures, equipment, or personnel of the sewage works.
6. Any water or wastes having a pH in excess of nine and five-tenths (9.5).

SECTION 710.180: - SUBSTANCES THAT MAY DAMAGE SANITARY SYSTEM

No person shall discharge or cause to be discharged the following described substances, materials, waters or wastes if it appears likely in the opinion of the Public Works Director that such wastes can harm either the sanitary sewers, sewage treatment process or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming their opinion as to the acceptability of these wastes, the Public

Works Director will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sanitary sewers, materials of construction of the sanitary sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances prohibited are:

1. Any liquid or vapor having a temperature higher than one hundred fifty degrees fahrenheit (150°F) (65°C).
2. Any water or waste containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two degrees fahrenheit (32°F) and one hundred fifty degrees fahrenheit (150°F) (0° and 65°C).
3. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths ($\frac{3}{4}$) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Public Works Director.
4. Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.
5. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement, to such a degree that any such material received in the composite sewage at the sewage collection and treatment facility exceeds the limits established by the Public Works Director for such materials.
6. Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits which may be established by the Public Works Director as necessary, after treatment of the composite sewage, to meet the requirements of the State, Federal, or other public agencies of jurisdiction for such discharge to the receiving waters.
7. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Inspector in compliance with applicable State or Federal regulations.
8. Any waters or wastes having a pH in excess of nine and five-tenths (9.5).
9. Materials which exert or cause:
 - a. Unusual concentrations of inert suspended solids (such as, but not limited to, fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).
 - b. Excessive discoloration (such as, but not limited to, dye wastes, and vegetable tanning solutions).

- c. Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage collection and treatment facilities.
 - d. Unusual volume of flow or concentration of wastes constituting "*slugs*" as defined in 700.010.
10. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or which are amenable to treatment only to such a degree that the sewage collection and treatment facility effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

SECTION 710.190: - PUBLIC WORKS DIRECTOR AUTHORITIES

- A. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 700.200, and which in the judgment of the Public Works Director, may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Public Works Director may:
 - 1. Reject the wastes;
 - 2. Require pretreatment to an acceptable condition for discharge to the public sewers;
 - 3. Require control over the quantities and rates of discharge; and/or
 - 4. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of Section 710.240 of this Article.
- B. If the Public Works Director permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Public Works Director, and subject to the requirements of all applicable codes, ordinances and laws.

SECTION 710.200: - GREASE, OIL AND SAND INTERCEPTORS—WHEN

Grease, oil, and sand interceptors shall be provided when, in the opinion of the Public Works Director, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients. Such interceptors shall not be required for private living quarters or dwelling units unless an approved, licensed business occupation is being conducted. All interceptors shall be of a type and capacity approved by the Building Official, and shall be located as to be readily and easily accessible for cleaning and inspection.

SECTION 710.210: - GREASE INTERCEPTOR MAINTENANCE

- A. It shall be the responsibility of the business to clean and maintain grease interceptors in an efficient operating condition.
- B. The business shall maintain a complete written record of the maintenance and cleaning of each grease interceptor. The maintenance records shall not be destroyed for at least one (1) year. The log shall include the name and address of any persons involved in the maintenance or cleaning of the grease interceptor. The log shall be available for review by the City's Public Works Department upon request.

SECTION 710.220: - PRELIMINARY TREATMENT AT OWNER'S EXPENSE

SECTION 710.230: - MANHOLE-WHEN REQUIRED

When required by the Public Works Director, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessible and safely located, and shall be constructed in accordance with plans approved by the Public Works Director. The manhole shall be installed by the owner at their expense, and shall be maintained by them so as to be safe and accessible at all times.

SECTION 710.240: - SPECIAL ARRANGEMENT WITH CITY

No statement contained in this Article shall be construed as preventing any special agreement or arrangement between the City and any industrial concern whereby any industrial waste of unusual strength or character may be accepted by the City for treatment, subject to approval by Little Blue Valley Sewer District and payment by the industrial concern.

SECTION 710.250: - DAMAGING SEWAGE WORKS - PENALTY

No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the sewage works.

Upon conviction or a plea of guilty, any person, firm or corporation violating or failing to comply with any of the provisions of this Chapter shall be subject to the penalty provisions provided for in Section 100.220 of the City Code.

SECTION 710.260: - AUTHORITY TO ENTER PROPERTY TO INSPECT

- A. The Public Works Director shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling, and testing of the sewer infrastructure in accordance with the provisions of this Chapter. The Public Works Director shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper, or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for waste treatment.
- B. While performing the necessary work on private properties referred to in Section 710.260(A), the Inspector or duly authorized employees of the City of Raymore shall observe all reasonable safety rules and regulations.
- C. The Public Works Director shall be permitted to enter all private properties through which the City holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.
