

SOLAR COLLECTOR INSTALLATION

Regulations

The Raymore Unified Development Code includes regulations for the siting and installation of solar energy systems. Solar energy systems may include solar photovoltaic (PV) panels and solar thermal systems such as solar water heaters. The UDC regulations strive to let property owners take full advantage of available solar resources and properly address safety and aesthetics.

The UDC provides regulations to address systems that are mounted on building roofs and systems that are mounted on the ground. Regulations for solar collectors mounted on pitched roofs vary depending on which roof face the collector is mounted; however, solar collectors may never extend above the ridge (top) of the roof. Solar collectors located on flat roofs may not extend more than four feet above the top of the roof or parapet. Regulations for solar collectors installed on the ground vary by the size of the property on which they are located.

Permit Requirements

If you are considering installing a solar energy system, contact the Community Development Department to determine the regulations and how they apply to your property. Next, the application included in this packet should be completed and returned to the Community Development Department for review. If the City determines that the proposed solar collector requires approval of a Conditional Use Permit, a separate application must be filed. Conditional Use Permits require review and approval from the Raymore Planning and Zoning Commission and City Council; notification to surrounding properties and a public hearing are also required. After zoning compliance is demonstrated, a building permit application can be filed.

Interconnection of solar collectors to the utility grid must be approved by Kansas City Power and Light. The City will not issue a building permit until approval from the utility is granted.

An application for installation of a solar energy system shall contain the following:

	<p>Building Permit. All solar installations must be in compliance with Building Codes and Electric Codes. All systems require a building permit. Contact the Building Inspections department at (816) 331-7916 for a building permit application.</p>
	<p>A plot plan showing:</p> <ol style="list-style-type: none">1. Property lines and physical dimensions of the property2. Location, dimensions, and types of existing major structures on the property3. Location of the proposed solar collector4. The right-of-way of any public road that is contiguous to the property5. Dimensions of the distance between the solar collector and any property line if the system will be installed on the ground.
	<p>Solar collector specifications, including:</p> <ol style="list-style-type: none">1. The model and manufacturer2. Dimensions of the collector3. Number of collectors to be installed4. Rated power output5. Required roof loads (if system is roof-mounted)
	<p>Details showing the proposed method of mounting the collector and the type of mounting hardware to be used. Applications for roof-mounted panels on pitched roofs must specify how far the collector will project away from the roof as measured from the point on the roof where it is mounted. Applications for roof-mounted panels on flat roofs must show how far above the deck or parapet of the roof the collector will project and how the mounting hardware will be screened.</p>
	<p>An engineering analysis showing compliance with the International Building Code and the International Residential Code, certified by a licensed professional engineer. (This information is frequently supplied by the manufacturer. Original seal and signature are not required.)</p>
	<p>A line drawing of the electrical components in sufficient detail to allow for a determination that the manner of installation conforms to the National Electrical Code. (This information is frequently supplied by the manufacturer.)</p>
	<p>Any other data necessary to show compliance with UDC Section 420.070.</p>

City of Raymore

SOLAR COLLECTOR INSTALLATION APPLICATION

APPLICATION NAME: _____

FOR OFFICE USE ONLY:	Case Number: _____	Required Fee: _____ \$45.00 _____
	P&Z Date: _____	CC1 Date: _____ CC2 Date: _____

APPLICANT/OWNER INFORMATION

Applicant Name: _____

Company: _____

Street Address: _____ City: _____ State: _____ Zip: _____

Telephone: _____ Fax: _____ E-Mail: _____

Property Owner Name (if different than applicant): _____

Street Address: _____ City: _____ State: _____ Zip: _____

Telephone: _____ Fax: _____ E-Mail: _____

*All correspondence on this application should be sent to (check one): Applicant Property Owner

LOCATION INFORMATION

Address or Legal Description of the property where the solar panel(s) will be located: _____

Lot size: _____ acres/square feet

SOLAR COLLECTOR INFORMATION

The system will be: Interconnected **OR** Off-Grid

The system will be installed on the: Roof of Main Structure: Front Roof Side Roof Rear Roof

Ground

Other: _____

Model and Manufacturer: _____

Square Footage of Panels: _____ **Rated Power Output:** _____

ADDITIONAL REQUIREMENTS

In addition to a completed application form, the following must be submitted:

- Valuation: \$ _____
- Submittal Requirements listed on Page 2 of the application packet

APPLICANT'S DECLARATION

The following declarations are hereby made:

- The undersigned is the owner or authorized agent of the owner or the officers of a corporation or partnership.
- The information presented and contained within this application is true and correct to the best of the undersigner(s) knowledge.

Printed Name: _____

Signature: _____

Date: _____

Printed Name: _____
