## Residents of Ward Road

From approximately Alexander Creek Drive to Sierra Drive, we are in the process of excavating the roadway and installing the gravel base for the new asphalt on Ward Road. This will be taking place through the end of next week (8/2). During the day the road will be down to one lane in areas so flaggers and traffic control will be present. Please be patient during this time as traffic patterns will be changing frequently during this process. We will try to finish this part of the work as quickly and efficiently as possible. At the conclusion of each day, the road will be back open to two way traffic. Please note, the gravel base will feel spongy when it is first installed, but it still will be solid to drive on. Please be aware of the construction equipment and construction workers as you drive through the construction site and limit trips in and out if possible. We thank you for your patience during this process and If you have any question or concerns please call Rick Vosika at 816/694/3459
